

## Stein Fibers PFAS-PFC Statement

Our normal PET staple fibers, bi-component low melt fiber and viscose rayon fiber products do not contain any polyfluoroalkyl substances (PFAS) or any perfluoro compounds (PFC and PFHxS). These types of chemicals are not used in the polymer manufacturing process or applied with any of the topical finishes. This declaration also states there are no Carbon-Fluorine (C-FL) bonds to our knowledge. This statement includes all of the PET fibers that we distribute and manufacture.

The response we have given is based upon current vendor information and our current knowledge as of the date of this declaration. No testing for the materials specified above has been conducted on the product. Stein Fibers agrees to notify the customers if we are notified by our suppliers of any changes in this declaration.

Regards,

Sam Eaddy  
Director of Quality  
Stein Fibers, LLC.
